Homework 3
Due February 13, 9:30am
50 points
CS 2235
Data Structures and Algorithms
Dr. Leslie Kerby

1. Using the SinglyLinkedList class developed in class, write a DoublyLinkedList class.

   Hint The powerpoints posted in Moodle for Chapter 3 contain much of the code and you are welcome to reference them; just make sure you understand it

2. Re-write your river of bears and fish from Homework 2, using the new DoublyLinkedList class (instead of an array).

Demonstrate that your program works. Submit your source code and output screenshots.
